### **Centralised Version Control for Plans**

Glenn Asher-Gordon, Information Governance Officer  
Tel: (0191) 277 2157  
Email: glenn.asher-gordon@twmuseums.org.uk

Glenn Asher-Gordon is the officer responsible for the update of the Emergency Response Plan and the Business Continuity Plan

### **1.2: Plan Maintenance**

North East Museums Service Lead is responsible for ensuring the local testing of plans and the reviewing/updating every six months (minimum) or if any significant staff changes occur, whichever happens first.

The process of establishing and implementing Business Continuity Management within the organisation will be done through the induction process and raising awareness of the plan through regular emails to staff.

### **1.3: Monitoring:**

Every venue compliance risk register includes the requirement to review and maintain its emergency plan and to be aware of the Business Continuity Plan and Counter Terrorism Plan. In addition, following any development, actions/lessons learned are logged.

The North East Museums Leadership Team will ensure regular validation exercises take place to ensure plans are being progressed, reviewed and maintained correctly. This will include planned and unplanned exercises.

## 1.5: Aims and Objectives of the Plan

The aim of this plan is to enable North East Museums to minimise the effects of service disruption in order to maintain Business Continuity.

A '**business interruption**' is defined as any unwanted incident which threatens staff, buildings or the operational procedures of the organisation and which requires the activation of the Business Continuity Plan to restore normal service.

For the purpose of this plan the following scales of interruption have been determined:

- The term "**minor business interruption**" is defined as a business interruption where no additional resources are required and is managed by the building manager.
- The term "**moderate business interruption**" is defined as a business interruption affecting one or more operations, where management of the response is managed by the building manager and relevant senior manager
- The term "**major business interruption**" is defined as a business interruption that requires the Director and North East Museums Leadership Team to respond.

If it is not possible for the appropriate Building Manager to deal with the business interruption, or if the interruption escalates, then this must be escalated to a Senior Manager.

In the event of a disruption the Business Continuity Comms Plan will be implemented to ensure that any damage to the reputation of the service is minimised.

Throughout a business interruption period a business interruption log should be completed (attachment 1 'Log of Incident'). At the end of the interruption period the log should be passed to the Head of Finance, Governance and Resources for reference, discussion and possible action, including lessons learned relevant to other services within the organisation.

## 1.6: Notification of a business interruption

Notification of a business interruption may originate from any source although it is envisaged that it will come from venue staff during opening hours, local councils or the university or from one of the emergency services during unoccupied periods.

The venue specific Emergency Plans set out the activation process to be followed in the event of a business interruption. Detailed information is available within the plan including contact information for essential services. Venue specific Emergency Plans also include a call out tree for staff and emergency services. Each venue has an identified location where staff can relocate to in the event of a business interruption preventing immediate access back in to the building.

## Section 2: Business Impact Analysis

Our mission is to welcome and connect people to the past, present and future of the North East through stories, shared spaces and experiences.

### ***We will help people understand and act on local and global challenges:***

- **Equality** – we will provide a warm welcome to everyone, break down barriers caused by inequality and discrimination and share diverse stories.
- **Wellbeing** – we will use our spaces and services to support people’s physical and mental health.
- **Social mobility** – we will deliver learning experiences, volunteering opportunities and pathways for personal development for people of all ages and backgrounds.
- **Climate** – we will raise awareness about the environment and encourage people to act for a sustainable future.

- **Place** – we will celebrate North East England, inspire local pride and use our resources to support research, innovation and economic regeneration.

North East Museums' Risk Management Framework outlines the overarching approach of North East Museums to risk management. The Framework ensures that risk management continues to be recognised as an integral part of good management practice. Monitoring of actions required to manage risks is a continuous process which enables North East Museums to operate effectively.

Using its Risk Management Framework North East Museums has assessed that the most significant interruption events that could have a Business Continuity impact are:

- **Denial of access to a Museum, Archive or Gallery:**
  - Loss of utilities
  - Fire or Flood / Structural damage / Terrorism or violent incident
  - Pandemic enforcing closure of buildings
- **Loss of buildings/collections**
- **Unavailability of staff**
  - Adverse weather conditions / Industrial action
  - Unplanned absence of key staff
- **Loss of ICT systems**
  - Service Failure
  - Cyber Attack

### **Section 3: Critical Risk Analysis and Recovery Process**

The following section summarises the potential impact on the organisation of each of these events over set periods of time and the actions required to mitigate those impacts to ensure that damage limitation is kept to a minimum. Each column highlights additional impacts and should be read sequentially.
